Summary

Full Stack Developer with 3 years of experience building and supporting web applications using Node.js, TypeScript, React.js, Next.js, Express.js, and MySQL. Strong backend development experience in REST APIs, relational databases, asynchronous workflows, caching, messaging, and distributed systems. Hands-on experience with AWS EC2 deployment, Linux server configuration, SSH, Security Groups, Nginx, and PM2. Familiar with Temporal, RabbitMQ, Redis, Docker, Jenkins, and CI/CD.

Technical Skills

Languages: TypeScript, JavaScript, SQL, Java
Frontend: React.js, Next.js, React Native, HTML5, CSS3, Responsive UI Development
Backend: Node.js, Express.js, REST APIs, TypeORM, Joi, Middleware, Validation, Error Handling, API Integrations
Databases: MySQL, MongoDB, Redis, Database Design, Query Optimization, Indexing, Transactions
Distributed Systems: Temporal, RabbitMQ, Background Processing, Failure Recovery, Resumable Workflows
Cloud Deployment: AWS EC2, Instance Provisioning, SSH, PEM Keys, Security Groups, Nginx, PM2, Linux Server Deployment
DevOps and Tools: Docker, Jenkins, CI/CD, Cron, Git/GitHub, SonarQube, Production Troubleshooting

Experience

Edulab Educational Exchange Pvt. Ltd. — June 2024 – Present

Backend Developer — *Mumbai, Maharashtra*

- Develop and maintain production backend services for a large-scale Examination Management System, processing millions of academic records across UG and PG programs.
- Build REST APIs and complex business workflows using Node.js, TypeScript, Express.js, TypeORM, and MySQL covering admissions, exam forms, hall tickets, timetables, marks, results, reassessment, and reporting.
- Work with relational tables containing millions of records, performing query optimization, indexing, migrations, transactions, bulk processing, and production data corrections.
- Implement long-running and fault-tolerant background processing using Temporal workflows and activities with chunking, retries, resumable execution, and failure recovery.
- Use RabbitMQ for asynchronous processing and Redis for caching and reducing repeated database operations.
- Support CI/CD and production deployments using Jenkins, Docker, Linux, PM2, Nginx, Git/GitHub, and SonarQube.
- Build bulk Excel import/export, validation, PDF generation, marksheet, ledger, and reporting workflows.

Cloudstrats Technologies

Full Stack Developer | *Intern → Full-Time* — *Mumbai, Maharashtra*

- Developed RESTful APIs and backend modules for an Attendance Management System using Node.js, Express.js, MySQL, and JWT Authentication.
- Implemented secure authentication and role-based authorization using JWT for Admin and Employee modules.
- Wrote comprehensive unit test cases using Mocha and Chai, improving code reliability and reducing regression issues.

Projects

Swarajya Foundation - NGO Portal | *React.js, React Native, Node.js, Express.js, MongoDB*

- Developed a full-stack NGO Fund Management Portal with web (React.js) and mobile (React Native) applications for managing organizational funds and member activities.
- Reduced manual accounting effort through automated balance calculations.

My Society | *MongoDB, MySQL, Next.js, Node.js, Firebase*

- Developing a full-stack Society Management System to streamline residential society operations.
- Implemented Firebase Authentication for secure user login and role-based access control for Admins, Committee, Members, and Residents.

Education

Shivaji University — 2018 – 2021

Bachelor of Computer Application (BCA)

Crio.Do Full Stack Development Program — Dec 2023 – Jun 2024

Full Stack Development Program
